VITOR FERREIRA NUNES

Software Developer | Full Stack | React.js | Flutter | Node.js
+55 (21) 98052-6011 • contact@vitornunes.dev • www.vitornunes.dev • Niterói - RJ, Brazil

Summary

Computer Science student at UFRJ, with experience in mobile and web application development, process automation, and API integration. Professional experience with Flutter and in building a web solution for document management and export process automation, running in production. Interested in building end-to-end solutions that bring together interfaces, services, and data.

Experience

Embarques Irmãos Nunes — Location

Freelance Developer — 2026

- Built a system to automate export processes and manage shipment documentation.
- Implemented authentication with access pre-approved by an administrator, and document storage on AWS S3.
- Built CRUD features for clients, products, and orders, with automatic generation of customs clearance documents.
- Automated the processing of order-related emails: AI-based attachment classification, adding the documents to the system, and automatic order status updates.
- Tech stack: React.js, Next.js, TanStack Query, and Orval on the front end; Node.js, Fastify, AWS S3, Scalar, and BetterAuth on the back end; PostgreSQL as the database.

DevMOB Project — UFRJ — Location

University Extension Project — 2023 - 2026

- Developed mobile interfaces using Flutter
- Developed backend features using Spring Boot
- Contributed to the development and maintenance of the project's applications
- Version control and team collaboration using Git/GitHub
- Contributed to the maintenance and evolution of existing features

Skills

Front-end: React.js · Flutter · HTML · CSS · JavaScript

Back-end: Node.js · Python · Spring Boot

Databases: MySQL · PostgreSQL

Tools: Git · GitHub · REST APIs

Education

Federal University of Rio de Janeiro — Expected graduation

Higher Education - Bachelor's Degree in Computer Science (in progress) — 12/2028

Languages

English
Fluent (reading, writing, and speaking)
